

Rafale Deal Controversy

Why in news?

\n\n

The Defence Minister refused to share the price details on Rafale purchase, citing the Security Agreement provisions.

\n\n

What is the Rafale aircraft?

\n\n

\n

- Rafale is a twin-engine medium multi-role combat aircraft.
- It is manufactured by the French company Dassault Aviation.
- Dassault claims Rafale has 'Omnirole'.
- This is the capability to perform several actions at the same time.
- Rafale can carry out both air-to-ground as well as air-to-air attacks.
- It can also carry out interceptions during the same flight.
- The aircraft is fitted with an on-board oxygen generation system (OBOGS).
- It suppresses the need for liquid oxygen re-filling or ground support for oxygen production.

\n

\n\n

India to buy French Rafale fighter jets

India's defence ministry has announced that it will buy 126 French-made Rafale combat aircraft in a massive \$11 billion deal that will increase the might of the world's fourth largest air force

\n\n

How did the deal evolve?

\n\n

\n

- Indian Air Force (IAF) raised the requirement for Medium Multi Role Combat Aircraft (MMRCA) in 2007.

\n

- This was to replace the aging fleet of MiG aircrafts.

\n

- **Tender** - Tenders for 126 Medium Multi Role Combat Aircraft (MMRCA) fighters were issued by India in 2007.

\n

- It was an open competition between companies including Dassault Aviation of France.

\n

- Dassault was announced as the lowest bidder in 2012.
\n
- **Earlier Deal** - Of the 126 jets required, 18 fighters were to be imported in a fly-away condition.
\n
- Hindustan Aeronautics Ltd (HAL) would manufacture the remaining 108 jets.
\n
- This was agreed to be with Transfer of Technology (ToT) from Dassault.
\n
- **Stall** - India and France were unable to decide on a price for the jets.
\n
- The workshare agreement between HAL and Dassault Aviation was signed in 2014.
\n
- But with the new NDA government in place, clarity on the progress of the deal remained unclear.
\n
- **New deal** - On PM's visit to France in 2015, India's intention to buy 36 Rafale aircraft in "fly-away" condition was announced.
\n
- Defence Minister announced the previous 126 fighter jet deal to be dead.
\n
- Subsequently, the deal for the acquisition of 36 aircraft was signed by the Defence Ministers of India and France in 2016.
\n
- This was done through a government-to-government deal.
\n

\n\n

What are the present concerns?

\n\n

- \n
- **ToT** - The current deal has a 50% offset component.
\n
- Accordingly, Dassault will manufacture items worth 50% of the deal in India.
\n
- However, the absence of transfer of technology (ToT) component is raised as an issue.
\n
- Also, no role is guaranteed for any Indian public sector company, including HAL.
\n
- **Deal** - The present deal as direct government-to-government agreement, as

against the earlier open tender, is criticised.

\n

- Also, the 36 fighters are said to be purchased at a much higher price than earlier negotiated.

\n

\n\n

What is the dispute with sharing price details?

\n\n

\n

- **Earlier deal** - The previous government's price for 126 aircraft was never finalised, and no contract was signed or executed.

\n

- Hence, no official figure on the price was ever given.

\n

- **New Deal** - Recently, the Defence Minister declined to share the cost of the Rafale fighters under the new deal, with Rajya Sabha.

\n

- It was said that the price details were "**classified information**".

\n

- This was as per the **Inter-Governmental Agreement** (IGA) between the Governments of India and France.

\n

- Accordingly, material exchanged under IGA is governed by the provisions of the **Security Agreement**.

\n

- However, in 2016, Minister of State for Defence had shared the price in the Lok Sabha in a written reply.

\n

- The basic price of each Rafale aircraft was said to be around Rs 670 crore.

\n

- At the time of its signing, the 36-aircraft deal was said to be worth around Rs 59,000 crore.

\n

\n\n

What is the Security Agreement?

\n\n

\n

- **Security** - Signed between the two nations in 2008, it has some confidentiality provisions.

\n

- It relates to Protection of Classified Information and Material in the field of Defence.
\n
- For any contract or sub-contracting contract with classified information and material, a security annex shall be drawn up.
\n
- The competent security authority from the information forwarding party shall specify what has to be protected by the receiving party.
\n
- **Renewal** - It was specified that the Agreement shall remain in force for a period of 10 years.
\n
- It shall be renewed by "tacit consent" for new 5-year period.
\n
- Accordingly, the agreement will continue unless one of the Parties notifies its intention to not renew.
\n
- This has to be given in writing 6 months prior to the end of the current period of validity.
\n
- The initial 10-year life of the Agreement signed in 2008, ended on January 24, 2018.
\n
- It is not clear if it has been renewed by tacit consent by the government.
\n

\n\n

What is the parliamentary procedure?

\n\n

- It has generally been the practice to share the cost of defence deals with Parliament.
\n
- However, in some cases, the details have been kept secret for reasons of national security.
\n
- Nevertheless, the government is duty-bound to share the pricing details with Comptroller and Auditor General (CAG) and the Public Accounts Committee (PAC) of Parliament.
