

RBI's Stance on Bank Capital Norms

What is the issue?

\n\n

\n

- Reserve Bank of India (RBI) has opposed government calls to relax the rules for risk weights and capital requirement for Indian banks.

\n\n

What is RBI's rationale?

\n\n

\n

- At present, the capital adequacy norms for Indian banks are higher than those recommended under Basel.

\n

- Government now calls for aligning the capital adequacy norms of Indian banks with those of Basel III to allow Indian banks to lend more.

\n

- But RBI says that applying Basel-specified risk weights would understate the “true riskiness” of loans on the books of these banks.

\n

- Relaxing the current risk-adjusted capital norms (Basel-III-plus norms) could hit the economy at a time when defaults are high and provisions low.

\n

- Indian banking system has a high proportion of nonperforming assets (NPAs) that are not provided for in relation to capital levels.

\n

- Introducing regulatory relaxations before bringing in structural reforms and with inadequate understanding of defaults could be detrimental to economy's interests.

\n

- So the case for a recalibration of risk-weights or minimum capital requirements would need to be carefully assessed.

\n

\n\n

What are RBI's proposals?

\n\n

\n

- **Capital norms** - RBI proposes to take a fresh look and intends to issue revised prudential regulations, including guidelines on -

\n

\n\n

\n

- i. exposure and investment norms
- ii. risk management framework
- iii. select elements of Basel III capital framework

\n

\n\n

\n

- **Board** - RBI called for legislative changes to do away with the need to nominate the central bank's officials as nominee directors on the boards of public sector banks.
- Former RBI governor Urjit Patel had suggested withdrawal of these nominee directors from the boards to avoid any conflict of interest.
- **PCA** - RBI also upheld the prompt corrective action (PCA) framework for weak banks, another point of contention with the government.
- RBI said that weak banks under the PCA framework have shown improvement in deposits.
- They have also shown lower growth in gross NPAs, relative to non-PCA public sector banks.
- **Besides**, the RBI is also looking at reviewing the guidelines for compensation for private sector banks.
- This follows a demand by banks for an objective assessment of remunerations for whole-time directors.
