

Regulating bitcoins in India

Why in News?

\n\n

The government is considering the introduction of a regulatory regime for virtual currencies such as Bitcoins.

\n\n

What is a bitcoin?

\n\n

\n

- Bitcoin is a type of crypto-currency.
- Crypto-currency is a digital currency that allows transacting parties to remain anonymous while confirming the transaction is valid.
- It is not owned or controlled by any institutions – government or private.

\n

\n\n

What is the current status of bitcoins in India?

\n\n

\n

- Bitcoins are classified only as movable property and more specifically as computer software.
- The government has not formally brought bitcoins under the definitions of currency or prepaid payment instruments.
- Neither did it make bitcoins illegal.
- It is thus right to say that currently the crypto-currency is neither illegal nor legal in India.

\n

- The pros and cons of legalising them is currently debated among the government circles.
- \n

\n\n

What are the benefits of legalising bitcoins?

\n\n

- \n
- Trading of bitcoins would be brought under the **stock market regulator**, Securities and Exchange Board of India (SEBI).
- \n
- Bitcoins can be traded on registered exchanges which will promote a formal tax base. Returns from investment in Bitcoins would be **taxed**.
- \n
- Use of bitcoins for **illegal activities** such as money laundering, terror funding and drug trafficking can be **checked**.
- \n
- If any foreign payment is made through Bitcoins, it would fall under the purview of Foreign Exchange Management Act,
