

Regulating Lobbying

What is the issue?

 $n\n$

\n

- Recently, the CBI alleged that AirAsia tried to influence India's international flying regulations through lobbyists.
- It is imperative to look at the varied issues in relation with the reality of lobbying.

\n

 $n\n$

What is lobbying?

 $n\n$

۱n

• Lobbying refers to the practice of influencing the policy decisions of the government.

۱n

- \bullet It refers to the business classes' efforts to shape the policies to suit its needs. $\ensuremath{\backslash n}$
- The decisions may be benign such as urging subsidies for electric vehicles.
- \bullet It could also be harmful like relaxing environment norms for coal-mining or having an impact on the national interest. $\mbox{\sc h}$
- Lobbying is an inescapable characteristic of any economy with a vibrant business ecosystem.

\n

 \bullet This is particularly prominent in systems that function in a democratic polity. $\ensuremath{\backslash} n$

 $n\n$

How is lobbying in India?

 $n\n$

\n

• The secretive habits of the licence raj still linger in terms of opacity in policy-making.

\n

• Amidst this, lobbying remains a grey area, which is neither recognised nor regulated.

\n

- Yet, the irony is that governments are subject to lobbying for sure.
- There is absence of a specific statute or even "guideline" in this regard.
- This is making way for a range of illegal activities which are hard to detect or control.

\n

 $n\n$

How have governments handled this?

 $n\n$

۱n

- \bullet Successive Indian governments have had middlemen in the defence business. \n
- The Bofors scandal of the mid-1980s resulted in a blanket ban on middlemen for defence purchases.

۱n

- However, middlemen still perform a service worldwide.
- They enable the governments to evaluate a range of choices and negotiate optimum deals.

۱n

- In 2014, the present government allowed middlemen back. \n
- But it was cautious with their re-entry, by specifying various conditions.
- These included delinking their commissions to the outcome of the negotiations.

\n

 $n\n$

How is it in other countries?

 $n\n$

\n

• In the US and some western European jurisdictions, lobbying is subject to disclosure statutes.

\n

• They make it mandatory to register, declare their client lists, activities, fees and itemise expenditure.

۱n

• These disclosure laws do not eliminate corruption.

• However, they allow for a considerable level of transparency.

• They make it possible for journalists and the general public to access information.

۱n

- It provides on which lobbyists had been paid, by whom and for what cause.
- It also allows tracking the outcome in terms of policy-making.
- Evidently, many cases of corruption come to light simply by accessing public records.

\n

 $n\$

What is the way forward?

 $n\n$

\n

- India could consider emulating the best practices in other parts of the world.
- This would work better, as against unrealistic restrictions on politicians and bureaucrats under Prevention of Corruption Act.
- \bullet A clear lobbying law would introduce transparency at the intersection of business and politics. $\mbox{\sc h}$
