

# **Reviving MSME sector**

#### What is the issue?

 $n\n$ 

MSME sector has been affected by credit and viability concerns and hence regulatory interventions are needed to address them.

 $n\n$ 

## What is the background?

 $n\n$ 

\n

- There are around 50 million MSMEs, both registered and unregistered, which stands as the biggest employer after agriculture sector.
- MSME sector cumulatively contributes <u>37.5% of India's GDP</u> and also account for 16% of bank lending.
- However, around 8% of credit to manufacturing micro and small enterprises and 13% to medium enterprises are estimated to be gross NPAs.  $\$

 $n\n$ 

#### What are the concerns?

 $n\n$ 

۱n

 Pradhan Mantri Mudra Yojana (PMMY) is a scheme to extend collateral free loans by Banks, Non-Banking Financial Companies (NBFCs) and Micro Finance Institutions (MFIs) to Small/Micro business enterprises and individuals in the non-agricultural sector.

 $n\n$ 

\n

• This was mainly done to enable MSMEs to setup or expand their business activities and to generate self-employment.

• **Selection** - The scheme helped banks to push the services sector lending below Rs. 5 lakhs significantly.

۱n

- $\bullet$  However, there is also an evidence of moral hazard following the lending.  $\ensuremath{\backslash} n$
- This is mainly because of <u>adverse selection</u> as several enterprises are <u>non-traceable</u> at the location mentioned in the applications.

 $n\n$ 

\n

- **Settlement delay** The government has put in place measures like e-Invoice, TReDX, Samadhan, GeM to ensure prompt payment of bills from public sector undertakings and central government departments.
- Even so, the State PSUs and state government departments continue to delay the bills of MSMEs, leading to NPAs.

 $n\n$ 

\n

- Loan disbursal Some banks follow a multi-layered approach to lend to the sector and as a result due diligence suffers.
- The branch that disburses is also expected to monitor and supervise the credit but does not have the time or manpower for that.
- $\bullet$  There is hardly any communication between the entrepreneur and the credit authority until an irregularity in the account surfaces. \n

 $n\n$ 

## What are the measures needed?

 $n\n$ 

- **Lending norms** Under priority sector lending, the sub-target for bank lending to the micro enterprises has been 7.5% of adjusted net bank credit.
- RBI has recently made that <u>all loans to MSME</u> will qualify as priority sector lending.
- Previously, loans up to Rs 10 crore per MSME borrower was only considered for priority sector calculation.

\n

- Apart from increasing thresholds in priority sector portfolio, RBI should also frame <u>credit risk assessment mechanism</u> for the MSMEs.
- **Revival** Though MSMEs have been declared as NPAs, they have no exit route of the sort facilitated under the IBC code or the Industrial Disputes Act.

\n

- Innovative institutional interventions like the <u>Industrial Health Clinics</u> should be leveraged to revive and restructure sick enterprises.
- Also, cluster development of MSMEs should be undertaken, thereby providing additional lending incentives.
- **Credit Guarantee** Credit Guarantee Fund Trust for Micro and Small Enterprise (CGTMSE) needs to be reviewed and redefined.
- The premium rates charged by CGTMSE were found to be high and the claim settlement process getting unacceptably late.
- It also has a role conflict with SIDBI as the latter is the promoter of MSME and at the same time secures its guarantee for the MSME enterprises financed directly by it.
- Asset registry Banks in India only accept fixed assets as collateral while giving loans to such companies, which have most of their capital invested in moveable assets. (raw materials/inventories)

 $n\n$ 

- Hence, setting up of a <u>Movable Asset Registry</u> will make it easier for larger units within the MSME segment to borrow from banks.
- **Credit registry** A <u>public credit registry</u> could be set up for MSMEs to distinguish between a bad and a good borrower and accordingly offer attractive interest rates to good borrowers from them.
- Also, role of credit rating agencies and effectiveness of internal credit rating tools should be enhanced, apart from digitising MSME lending.
- Since MSMEs are still <u>largely debt driven</u> and not equity driven, it is important that access to credit should be easier, cleaner, and faster.  $\n$

 $\bullet$  Altogether, healthy growth of MSME is crucial for employment and growth of the manufacturing sector as a whole.  $\mbox{\sc h}$
