

Rise of “Shanghai Cooperation Organisation”

What is the issue?

\n\n

\n

- The recent “Shanghai Cooperation Organisation” (SCO) summit in Qingdao (China) was the 1st for India and Pakistan as full time members.

\n

- SCO has risen as an internationally important grouping due to the profile of its members and the under-performance of other international forums.

\n

\n\n

What is the history of SCO?

\n\n

\n

- The SCO grew out of the Shanghai Five grouping (Russia, China, Kazakhstan, Tajikistan and Kyrgyzstan), which was set up in 1996.

\n

- While its initial goal was to resolve boundary disputes in the region, it has evolved into a security and economic cooperation block over the years.

\n

- In 2001, Uzbekistan was also admitted as a member and the organization was re-christened as “Shanghai Cooperation Organisation” (SCO).

\n

- While India and Pakistan have been observers since 2005, in the 2017 SCO meet, both were admitted as full members.

\n\n

Why is SCO critical for India?

\n\n

\n

- **Significance** - The admission of India and Pakistan has expanded the geographical, demographic and economic profile of the SCO.

\n

- SCO now has about half the world's population and a quarter of its GDP and its boundary extend southwards to the Indian Ocean.

\n

- The SCO's relevance for India lies in geography, economics and geopolitics as its members occupies a huge landmass adjacent to India's neighbourhood.

\n

- Central Asian SCO members border Afghanistan and a narrow strip of land separates southern Tajikistan from Pakistan-occupied Kashmir.

\n

- **Logistics** - When you have complicated relations with your neighbours, it makes sense to strengthen relations with your neighbours' neighbours.

\n

- With Pakistan joining the Organisation and Afghanistan and Iran knocking on the doors for membership, the logic of India's membership becomes stronger.

\n

- Since the break-up of the Soviet Union, the optimal development of India's relations with Central Asian countries has been constrained severely.

\n

- Factors like lack of overland access through Pakistan, Afghanistan and Iran,

and politico-security concerns proved difficult to overcome.

\n

- With new multimodal transport corridors now envisaged through Iran, there are again prospects of invigorating trade and investment links with this region.

\n

\n\n

What are the political equations within SCO?

\n\n

\n

- In the formative years of the SCO, Russia pushed strongly for India to join it, to somewhat balance China's economic dominance in Central Asia.
- China's own insecurities made them obstruct Indian entry into the grouping back then, which help it maintain its clout over the organisation.
- Currently, with China having grown confident with a strong economic might, it seems to have grown more inclined to accept Indian membership.
- Notably, the central Asian region is the hotbed for China's ambitious "Belt and Road Initiative" and Indian participation will help further this.
- Nonetheless, it has secured the simultaneous admission of Pakistan into the SCO as a counterbalance to India's motives.
- In this context, India too has managed to carve out a niche role for itself in the region alongside China and Russia through active diplomatic outreaches.
- Also, thus far, Indo-Pak equations within the forum have been pleasant, betraying naysayers who speculated turbulence due to the new entrants.

\n

\n\n

What are the aspects to lookout for India and Pakistan in SCO?

\n\n

\n

- **Border Dispute** - Russian President Putin has suggested that cooperation within SCO may pave the way for an India-Pakistan rapprochement.
- He also recalled that SCO membership had facilitated resolution of China's boundary disputes with Russia and Central Asian countries.

\n

- While the circumstances are not comparable, and Indo-Pak disputes are not merely border related, the hope expressed is nonetheless a positive sign.

\n

- Significantly, China made substantial concessions to settle its boundary disputes with Russia and Central Asia, in pursuit of larger strategic objectives.

\n

- **Regional Anti-Terrorist Structure** - RATS as a principle organ of SCO, coordinates for security and stability, through intelligence-sharing.

\n

- India and Pakistan, which exchange mutual recriminations in such matters, have to find ways of cooperating in the RATS.

\n

- **Defence cooperation** - India has agreed to participate in the SCO's counter-terrorism military exercises in Russia later this year.

\n

- Here, Indian and Pakistani troops will likely operate together, an event that has never occurred before.

\n

- Reconciling Indian and Pakistani perspectives in the SCO's initiatives on Afghanistan would be yet another challenge.

\n

\n\n

How does the future of SCO look?

\n\n

\n

- **Dilution** - The expansion of SCO has diluted its unanimity on hitherto shared perspectives on certain critical issues.

\n

- Notably, India and Pakistan aren't signatories of "Nuclear Non-proliferation Treaty", a provision that was held in high regard by SCO.

\n

- India's reservations on China's BRI are accommodated by excluding the project from the list of endorsed programs of SCO.

\n

- Even the anti-terrorism initiatives and documented statements are being diluted cautiously to accommodate divergent opinions on the same.

\n

\n\n

\n

- **Eastern Grouping** - The structural strengthen and diversity of the group as an alliance of eastern power has seen SCO rise as a potent counter to the west.

\n

\n\n

\n

- While some seen this as a continuation of cold war political equations of the Soviet Block, there has been a drastic change in the rhetoric.

\n

- Notably, the anti-west stands of SCO are not stringently pronounced like the Soviet era, and the U.S. has a working relationship with many SCO members.

\n

- Chinese Dominance - The worldwide retreat of U.S. under the inward looking regime of Mr. Trump is paving the way for the stoic rise of China.

\n

- SCO like organisations are seeing China consolidate its structural base in the international forum, forcing even Russia to fall in line.
