

Roles of Finance Commission and 15th FC

What is the issue?

\n\n

\n

- 15th FC's terms of reference (ToR) is gaining significance with states' demand for more equity and fairness in resource allocation.

\n

- In this context, it is essential to look into the roles and responsibilities of Finance Commission and the ToR of 15th FC.

\n

\n\n

Why is FC's role so significant?

\n\n

\n

- **Unity** - Article 1 of the Constitution of India recognises India as a Union of States.

\n

- Real fairness and equity in the matter of devolution of powers and resources to the States is essential to preserve this stated unity.

\n

- The foremost objective of the FC is thus an equitable distribution of financial resources between the two units of the Union.

\n

- **Resources** - The fundamental tasks relating to income growth, human development, livelihoods, environment, etc are entrusted to the States.

\n

- At present, the States do not have adequate resources as well as the right to raise such resources to fulfil these tasks.

\n

- FC's role gains significance in equipping states with adequate resources to take up these major tasks of nation-building.

\n

- **Federalism** - The Centre's capacity to mobilise resources is far greater than that of the States.

\n

- But states are required to undertake development expenditures that far

exceed their revenue generating capabilities.

\n

- The Constitution entrusts FC with the responsibility of addressing this anomaly and asymmetry in India's federal system.

\n

- **Recent developments** - The finances of States have received a double blow due to demonetisation, and Goods and Services Tax.

\n

- Post-GST, states have hardly any major tax left with them to make a difference to State resources.

\n

\n\n

What are the concerns with 15th FC's ToR?

\n\n

\n

- **Demographic differences** - From 2001 and 2011 many states have successfully reduced their rate of population growth.

\n

- This does not mean less expenditure for these states.

\n

- These have incurred huge fiscal costs to achieve a lower population growth and healthy demographic indicators.

\n

- They have made substantial investments on education, health and directly on family welfare programmes.

\n

- Moreover it creates new commitments by the States to those in labour force and especially to senior citizens.

\n

- Thus using the population data of 2011 as the base for tax devolution should not reduce the allocation to these States.

\n

- **Caring elderly** - Many States have achieved a replacement rate of growth of population or have gone below that rate in a short span of time.

\n

- An immediate effect of this is a sharp rise in the proportion of elderly population.

\n

- The enhanced costs for states for caring them must be considered by the FC in allocation and in deciding the population criterion.

\n

- **Revenue deficit** - It is specified that the 15th FC may also examine whether

revenue deficit grants be provided at all.

\n

- Revenue deficits are offshoots of the path of development followed by States.
- It cannot be brought down in the short term.
- To discontinue post-tax devolution of revenue deficit grants would go against the principle of cooperative federalism.
- **Approach** - The FC should not take a “residual approach” of distributing what is left over after providing for Centre's requirements.
- However, the 15th FC's ToR explicitly privilege the “committed expenditures” of the Centre.
- **Policy domain** - The 15th FC is asked to consider proposing performance-based incentives.
- This grant is proposed beyond those relating to fiscal responsibility, population and devolution to local bodies.
- States see this as an attempt to micro-manage their fiscal domain.
- This is because states have set their own agenda for development.
- The sectors may include health, education, forest management, public distribution of food, agricultural production, etc.
- This development resulted not necessarily because of Central incentives.
- It was rather the effect of the best practices followed by the states depending on their regional needs and demands.
- Thus, FC proposing “measurable performance-based-incentives” would affect the liberty and flexibility of the states' policy realm.
- It is not the duty of the FC to venture into the realm of day-to-day governance of the states.

\n

\n\n

\n

- **Fiscal space** - The 14th FC recommended an increase in devolution to states from 32% to 42%.

\n

- It is argued that the fiscal space available to the Centre had shrunk due to this.
\n
- However, when implementing this, the Union government cut allocations to several Centrally Sponsored Schemes in 2015-16.
\n
- The cutback was almost equal to the amount received by the States as a whole on account of the rise in share of taxes and duties.
\n
- Thus, there is evidently no squeeze of the fiscal space available to the Union government.
\n
- In fact, the total resources devolved from Union to all States put together has been declining as a share of GDP for some years now.
\n
- There is thus no ground for reducing the share of States in the vertical devolution.
\n
- **Diversity** - To recognise India's diversity is also to recognise the States' diverse paths of development.
\n
- The FC must facilitate diversity and a democratic path of development.
\n
- Respecting principles of equity and fairness in allocating resources between the Centre and States is essential for this.
