

Shifting the Focus on Indian Navy

Why in news?

\n\n

The Indian Navy celebrates Navy Day on December 4 to commemorate its successful sea-borne attack off Karachi harbour during the 1971 India-Pakistan war.

\n\n

What is the importance of Indian Navy?

\n\n

\n

- According to warship replacement programme, Indian Navy (IN) has to maintain a force level of at least 120 ships with an average life of 20 years.

\n

- It has to induct at least six warships annually.

\n

- Over the years the IN has developed skill-sets to build warships for tropical conditions characterised by high temperatures, humidity and salinity that creates a corrosive climate.

\n

- Therefore, IN warships are export-worthy marine platforms to other Indian Ocean littoral countries.

\n

- The IN is also an instrument of maritime diplomacy.

\n

- It involves goodwill visits by warships to foreign ports, naval exercises, humanitarian assistance and disaster relief, besides persuasive deployment.

\n

\n\n

What is the problem?

\n\n

\n

- Over the years the army and air force has been accorded priority to counter landward threats.

- \n
- This has constrained IN only to warship replacement programmes.
- \n
- But there is a strategic shift towards China with the recent stand-off at Doklam and the presence of Chinese warships in the Indian Ocean.
- \n
- The Indian and Chinese navies come into contact with each other either in the waters of the Indian Ocean or the South China Sea.
- \n
- In June 2016 a Chinese spy ship tailed two Indian Navy warships in Japanese territorial waters east of Okinawa.
- \n
- Similarly in 2012, another Indian warship, the INS Airawat, was challenged by Chinese navy boats while sailing along the coast of Vietnam.
- \n
- So, the naval firepower is critical for India to consolidate its strategic interests in the IOR & SCS.
- \n
- Hence proper focussed should be given on it.
