

Troubling Power sector

What is the issue?

\n\n

The power sector is stuck in a vicious cycle and hence the revival must start with restoring the financial health of the Discoms.

\n\n

What is the vicious circle surrounding the power sector?

\n\n

\n

- The pricing of power leaves Discoms in India with a peculiar dilemma, wherein the more they sell, the more they lose.

\n

- Poor financial condition of the Discoms made them to demand less power from the power generating companies(Gencos) in the form of Power purchase agreements.

\n

- This in turn is impacting on the financial stability of power generating companies.

\n

- The poor financial condition of the Discoms has resulted in mounting dues of more than Rs. 36,000 crores that they have to pay to Gencos.

\n

- As Gencos are not getting their dues from Discoms they are unable to pay regularly to Coal India where the dues have gone beyond Rs. 10,000 crores.

\n

- The banking industry too is saddled with the additional problem of potential NPAs on account of non-performing Gencos.

\n

- Thus there is a vicious circle that has afflicted the energy sector and if the issues are not addressed expeditiously, there could be a serious crisis at hand that can impact the entire economy.

\n

\n\n

Has UDAY scheme addressed these concerns?

\n\n

\n

- UDAY provides for the financial turnaround and revival of Power Distribution companies (DISCOMs), wherein states were to take over 75% of Discom debts as on September 30, 2015.

\n

- This was to provide fiscal space to the Discoms and “improve” their balance sheets.

\n

- However, Most of the Discoms failed to carry out mandates which includes critical activities like reduction of AT&C losses, elimination of Average Revenue Realized (ARR) & Average Cost of Supply (ACS) gap, feeder metering, price rationalisation etc.

\n

- AT&C loss is the difference between energy input units into the system and the units for which the payment is collected.

\n

- Out of all UDAY States, 13 have actually reported higher Aggregate Technical & Commercial(AT&C) losses as compared to previous year.

\n

- Also, the 2018 Economic Survey revealed that due to these bonds, the States’ Gross Fiscal Deficit to GDP Ratio got increased by 0.7%.

\n

- Thus the fundamental issues remain unaddressed and most of the Discoms continue to be in trouble.

\n

- On account of such poor financial condition of Discoms, no new power purchase agreements(PPAs) are being floated even though there is demand for power.

\n

\n\n

What are the measures needed?

\n\n

\n

- Improving the financial health of Discoms should start with resolving issues like separate feeder lines, auditing, strong action against defaulters and irrational pricing mechanisms.

\n

- Other states can learn from the successful models, such as in Gujarat, and make out their own plan through intensive discussions with all the stake holders.

\n

- Coal production will need to be ramped up substantially and the Coal Project Monitoring Group will need to be activated to facilitate faster clearances.

\n

- A high-level empowered committee needs to be set up to examine each stressed projects, empowered to settle disputes and work out a rehabilitation package.

\n

- Finally, the governmental push for the renewable energy sector should not burden the power generating companies with the rising cross-subsidisation of electricity.

\n

- Cross subsidization is the practice of charging higher prices to one group of consumers to subsidize lower prices for another group.

\n

- Promoting renewable energy is laudable, but this has to be borne by the society (through taxation) and not by the entities that are already in trouble.
