

Troubling Power sector

What is the issue?

 $n\n$

The power sector is stuck in a vicious cycle and hence the revival must start with restoring the financial health of the Discoms.

 $n\n$

What is the vicious circle surrounding the power sector?

 $n\n$

\n

- The pricing of power leaves Discoms in India with a peculiar dilemma, wherein the more they sell, the more they lose.
- Poor financial condition of the Discoms made them to demand less power from the power generating companies(Gencos) in the form of Power purchase agreements.

۱'n

• This in turn is impacting on the financial stability of power generating companies.

\n

- \bullet The poor financial condition of the Discoms has resulted in mounting dues of more than Rs. 36,000 crores that they have to pay to Gencos. \n
- \bullet As Gencos are not getting their dues from Discoms they are unable to pay regularly to Coal India where the dues have gone beyond Rs. 10,000 crores. \n
- The banking industry too is saddled with the additional problem of potential NPAs on account of non-performing Gencos.
- Thus there is a vicious circle that has afflicted the energy sector and if the issues are not addressed expeditiously, there could be a serious crisis at hand that can impact the entire economy.

 $n\n$

\n

• UDAY provides for the financial turnaround and revival of Power Distribution companies (DISCOMs), wherein states were to take over 75% of Discom debts as on September 30, 2015.

۱n

• This was to provide fiscal space to the Discoms and "improve" their balance sheets.

\n

- However, Most of the Discoms failed to carry out mandates which includes critical activities like reduction of AT&C losses, elimination of Average Revenue Realized (ARR) & Average Cost of Supply (ACS) gap, feeder metering, price rationalisation etc.
- AT&C loss is the difference between energy input units into the system and the units for which the payment is collected.
- Out of all UDAY States, 13 have actually reported higher Aggregate Technical & Commercial(AT&C) losses as compared to previous year.
- Also, the 2018 Economic Survey revealed that due to these bonds, the States'
 Gross Fiscal Deficit to GDP Ratio got increased by 0.7%.
- Thus the fundamental issues remain unaddressed and most of the Discoms continue to be in trouble.

۱'n

• On account of such poor financial condition of Discoms, no new power purchase agreements(PPAs) are being floated even though there is demand for power.

\n

 $n\n$

What are the measures needed?

 $n\n$

\n

- Improving the financial health of Discoms should start with resolving issues like separate feeder lines, auditing, strong action against defaulters and irrational pricing mechanisms.
- Other states can learn from the successful models, such as in Gujarat, and make out their own plan through intensive discussions with all the stake holders.

\n

- Coal production will need to be ramped up substantially and the <u>Coal Project</u>
 <u>Monitoring Group</u> will need to be activated to facilitate faster clearances.
 \n
- A high-level empowered committee needs to be set up to examine each stressed projects, empowered to settle disputes and work out a rehabilitation package.

\n

• Finally, the governmental push for the renewable energy sector should not burden the power generating companies with the rising <u>cross-subsidisation</u> of electricity.

\n

- Cross subsidization is the practice of charging higher prices to one group of consumers to subsidize lower prices for another group.
- \bullet Promoting renewable energy is laudable, but this has to be borne by the society (through taxation) and not by the entities that are already in trouble. \n
