

## **UPSC Daily Current affairs| Prelim Bits 04-01-2020**

### **Patola Saree**

- Patola, the trademark Saree of Gujarat, is considered to be very costly and worn only by the Royals or the Aristocrat.
- Reason being the raw material silk yarn is purchased from Karnataka or West Bengal, where silk processing units are situated, thus increasing the cost of the fabric manifolds.
- It can take six months to one year to make one sari due to the long process of dyeing each strand separately before weaving them together.
- Patola was woven in Surat, Ahmedabad and Patan.
- Highly valued in Indonesia, became part of the local weaving tradition there.
- Recently under initiative of Khadi and Village Industries Commission (KVIC), a first Silk Processing Plant was inaugurated at Surendranagar in Gujarat.
- This would help cut down the cost of production of silk yarn drastically and increase the sale and availability of raw material for Gujarati Patola Sarees locally.

### **Khadi and Village Industries Commission (KVIC)**

- The Khadi and Village Industries Commission (KVIC) is a statutory body formed by the Government of India, under the Act of Parliament, 'Khadi and Village Industries Commission Act of 1956'.
- It is an apex organization under the Ministry of Micro, Small and Medium Enterprises, with regard to khadi and village industries within India.

- It is a place where herbs, fruits and vegetables are grown in the school premises for use in preparation of Mid-Day Meal.
- **Kala Utsav** - Initiative of the Department of School Education & Literacy to recognize the importance of aesthetics and artistic experiences for school students, which play a major role in creating awareness of India's rich cultural heritage and its vibrant diversity.

## **EVALI Disease**

- Recently the number of deaths in the US caused due to the mysterious respiratory illness linked to vaping and e-cigarettes rose to 55.
- As of December 2019, the Centers for Disease Control and Prevention (CDC), a US federal agency, has reported 2,561 cases across the country who have suffered from the illness.
- The CDC is tentatively referring to the disease as EVALI (e-cigarette, or vaping, product use associated lung injury).

- E-cigarettes, also called 'vapes' or 'electronic nicotine delivery systems (ENDS)', are battery-run devices that were originally marketed as a safer alternative to smoking traditional cigarettes.
- The disease 'EVALI' is unknown to doctors, and a link between vaping and the lung illness is yet to be concretely established.
- Symptoms, according to the CDC, are those in common with other respiratory illnesses, including coughing, chest tightness, and shortness of breath, extreme fever or fatigue.

## **Extraocular Vision**

- Recently researchers have shown that a species of brittle stars, which are relatives of starfish, can see even though it does not have eyes.
- The red brittle star (*Ophiocoma wendtii*), which lives in the coral reefs of the Caribbean Sea, becomes only the second creature, after a sea urchin species, known to have this ability.
- The ability to see without eyes is known as extraocular vision.
- Previous researchers have defined it as the ability to resolve scenes without discrete eyes.
- In sea urchins and brittle stars, extraocular vision is facilitated by the photoreceptor cells found on their bodies.
- The researchers suggest that a brittle star sees with the help of light-sensing cells that cover its entire body.
- These light-sensing cells give the brittle star visual stimuli, allowing it to recognize coarse structures such as rocks, the research suggests.

## **Kalapani Issue**

- Located within Uttarakhand, Kalapani is a 372-sq km area bordering far-west Nepal and Tibet.
- As per the administrative records, dating back to 1830s the Kalapani area had been administered as part of the Pithoragarh district (then Almora district).
- According to Nepal's claim, it lies in Darchula district, Sudurpashchim Pradesh.
- The dispute is because of the ambiguity of the source of the Kali River. Nepal views Kali river as Lipu River as opposed to India's view.
- In the Indian view, the Kali River begins only after Lipu Gad/river is joined by other streams arising from the Kalapani springs.
- The area between the Lipu Gad/Kalapani River and the watershed of the river is the disputed Kalapani territory.
