Pradhan Mantri JI-VAN Yojana

Cabinet recently approves an amendment in Pradhan Mantri JI-VAN Yojana for providing financial support to Advanced Biofuel Projects.

- **PM JI-VAN Yojana** - Pradhan Mantri JI-VAN (Jaiv Indhan- Vatavaran Anukool fasal awashesh Nivaran) Yojana.
- It is a scheme aimed at promoting the production of **cellulosic ethanol or 2nd-generation (2G) bioethanol** from lignocellulosic biomass and another renewable feedstock.

Lignocellulosic biomass (LCB) is a heterogeneous polymeric material that is made up of carbohydrates, lignin, and other components.

- **Launched in** - 2019.
- **Timeline** - 5 years. (recently extended upto 2028-29).
- **Implemented by** - Centre for High Technology (CHT), a technical body under the aegis of Ministry of Petroleum and Natural Gas.
- **Objectives**
 - Establishing commercially viable projects for 2G ethanol production,
 - Providing farmers with a direct income source from their agricultural waste, and
 - Addressing environmental pollution concerns.
- The initiative is supported financially through **Viability Gap Funding (VGF)**.

Viability Gap Funding (VGF) is a financial support mechanism by the government to encourage private sector participation in infrastructure projects that are financially unviable but have significant economic and social importance.

- The ethanol produced by the scheme beneficiaries will be mandatorily supplied to Oil Marketing Companies (OMCs) to benefit under the Ethanol

Blending Programme (EBP).

Recent amendments

- The modified scheme extends timeline for implementation of scheme by **5 years** i.e. till 2028-29 and includes advanced biofuels produced from lignocellulosic feedstocks.
- Bolt-on plants & Brownfield projects would also now be eligible to leverage their experience and improve their viability.
- To promote multiple technologies and multiple feedstocks, preference would now be given to project proposals with new technologies and innovations in the sector.

Investor Education and Protection Fund

The Banking Laws (Amendment) Bill, 2024, recently proposes simultaneous and successive nominations of up to 4 nominees.

- The fund is designed to promote investor education and safeguard the interests of investors, and it is responsible for making refunds of unclaimed shares and dividends.

Depositor Education and Awareness (DEA) Fund collects unclaimed deposits from banks in India including savings, fixed deposits, current accounts, and more, that have been inactive for 10 years or longer.

- **Established in** - 2016.
- It is established under Section 125 of the ***Companies Act, 2013***.
- The unpaid or unclaimed amounts belonging to a company's investors are pooled and credited into the IEPF.
- **Administered by** - IEPF Authority consisting of a chairperson, a chief executive officer and such other members, not exceeding 7, appointed by the Central Government.
- The IEPF Authority maintains separate accounts and other relevant records relating to the funds as prescribed after consultation with the ***Comptroller and Auditor-General of India***.

- The funds of the IEPF are the amount accumulated/credited to the IEPF as per the provisions of the Act.
- The IEPF Authority will utilize and spend the money of the IEPF funds only for the purposes mentioned in the Act.
- **Audited by** - The Comptroller and Auditor-General of India will audit the accounts of the IEPF.
- The IEPF Authority will forward the audited accounts with the audit report annually to the Central Government.
- The IEPF Authority will also put together its annual report for every financial year, giving a complete summary related to its activities during the year and forward the copy to the Central Government.
- The Central Government will lay down the annual report by the IEPF Authority and the audit report given by the Comptroller and Auditor-General of India before each House of the Parliament.

MDR-TB & XDR-TB

India is getting ready to roll out BPaL (bedaquiline, pretomanid, and linezolid) regimen for all multi/extensively drug-resistant tuberculosis patients.

- Tuberculosis (TB) is an infectious disease caused by a germ called ***Mycobacterium tuberculosis***.
- Tuberculosis is spread from human to human through the release of droplets from the lungs or airways of an infected person. air when a person sneezes, coughs, or breathes.
- This spread can happen through, coughing, sneezing, singing, playing a wind instrument, and talking (to a lesser extent).

	MDR-TB	XDR-TB
Definition	Multi-Drug resistant Tuberculosis (MDR-TB) is resistant to at least two of the main "first-line" drugs used to treat TB.	TB may also be extensively drug-resistant (XDR-TB) which are strains that are resistant to two or more of the "2 nd -line" drugs.

Causes	It is a form of TB disease caused by a strain of <i>M. tuberculosis</i> complex, resistant to rifampicin and isoniazid.	It is a more serious form of MDR-TB that does not respond to the most effective second-line anti-TB drugs.
Treatment	MDR-TB is treatable and curable with second-line drugs like Bedaquiline.	It often leaves patients without any further treatment options.
Status	In 2022, an estimated 410,000 people developed MDR-TB globally, however, the treatment success rate for MDR-TB is still low.	The global cure rate for XDR-TB is much lower at 20% and it is associated with a 44% death rate.
Diagnosis	DST (culture or molecular method) is necessary for early diagnosis and treatment of MDR-TB or XDR-TB.	DST (culture or molecular method) is necessary for early diagnosis and treatment of MDR-TB or XDR-TB.

Acute Encephalitis Syndrome (AES)

Gujarat, with over 70 AES deaths recently, could benefit from Bihar's experience in managing this deadly disease.

- **About**- AES, including Japanese Encephalitis (JE), is a neurologic condition caused by various pathogens like viruses, bacteria, fungi, and toxins.
- **Other names**- Known as 'Chamki Fever' or Litchi Virus in India.
- **Outbreaks**- JE outbreaks typically align with the monsoon period due to increased mosquito density, while other encephalitis viruses, especially enteroviruses, occur year-round as waterborne diseases.
- **Affected age group**- Primarily affects children under 15 years.
- **Symptoms**- Sudden fever, neurological issues like confusion, disorientation, delirium, or coma.
- **Endemic zones**- Predominantly found in Bihar, Assam, eastern UP, West Bengal, and some areas of Tamil Nadu.

- **Litchi link-** Outbreaks in North and East India have been associated with children consuming unripe litchis on an empty stomach, leading to hypoglycemia and severe health issues.
- **Prevention-** Improve access to safe drinking water, sanitation, and reduce mosquito density.
- **Vaccination-** Since 2013, the Government of India has included 2 doses of JE vaccine in the Universal Immunization Program (UIP) for children at 9 months and 16-24months.
