Withdrawal of General Consent to CBI

- Recently, the Maharashtra government withdrew its general consent to the [Central Bureau of Investigation \(CBI\)](#) to probe cases in the State.
 - The move comes a day after the CBI registered an FIR in the TRP scam after taking over the probe based on an FIR filed in Uttar Pradesh.
 - **General Consent** - is normally given to help the CBI seamlessly conduct its investigation into cases of corruption against central government employees in the concerned state.
 - Maharashtra is the fourth State after Andhra Pradesh, West Bengal and Rajasthan to take such an action.
 - Outcomes of the move
1. Withdrawal of General Consent means the CBI will not be able to register any fresh case involving a central government official or a private person stationed in Maharashtra without getting case-specific consent.
 2. Withdrawal of consent will only bar the CBI from registering a case within the jurisdiction of concerned states.
 3. The CBI could still file cases in Delhi and continue to probe people inside Maharashtra.
 4. In simple terms withdrawal of consent means that CBI officers will lose all powers of a police officer as soon as they enter the state unless the state government has allowed them.
 5. It will have no impact on investigation of cases already registered with CBI as old cases were registered when general consent existed.

South Asian Flash Flood Guidance System

- Recently, the India Meteorological Department (IMD) has launched the South Asian Flash Flood Guidance System (FFGS).
- It is aimed at helping disaster management teams and governments make timely evacuation plans ahead of the actual event of flooding.
- South Asian Flash Flood Guidance System has been developed by US-based Hydrologic Research Centre after the World Meteorological Organisation (WMO) and few South Asian countries put forth their views and the urgent need for such a warning system.

 2. Flash flood threat warning will be issued six hours in advance, whereas flood risk warning will be issued 24 hours in advance.
 3. Warnings about watershed level will be issued 12 hours in advance.
- India is leading the delegation of nations, including Bhutan, Sri Lanka, Bangladesh and Nepal, in sharing hydrological and meteorological data towards preparing flash flood forecasts.
 - India's National Disaster Management Authority (NDMA) and the Central Water Commission (CWC) partnered in developing the system.

Flash Floods

- Flash Floods are sudden surges in water levels during or following an intense spell of rain.
- These are highly localised events of short duration with a very high peak and usually have less than six hours between the occurrence of the rainfall and peak flood.
- The flood situation worsens in the presence of choked drainage lines or encroachments obstructing the natural flow of water.
- Forecasting flash floods is very difficult as an event can occur within three to six hours and the water run-off quantity is very high.
- Frequency of extreme rainfall events has increased due to climate change and south Asia is highly prone to flash floods.
