

Agriculture contributes to around 18% of GDP & employs more than 50% of people. Agriculture faces problem of low return due to climatic condition, less mechanisation, high price input cost, etc.

Need for Agriculture Investment :-

- 1) Make country food independ. → food security
- 2) Employment →
- 3) forward & Backward linkage →
Promote other industries of services sector.
- 4) Improve return & benefit farmer.
- 5) Loss due to climate change.
- 6) High cost of seed, fertilisers.
- 7) poor mechanisation.
- 8) Rural development.

Investment delivers high interest

- ↳ reduce the cost of input.
- ↳ More alternative available.
- ↳ Method to deal with situation.
- ↳ Skilling + New technique all with improve input to farmer return result in output.

Agriculture is mainstay of rural economy & Niti Aayog vision by double farmer income can be fulfill by investment into the sector.
