

Qm Revitalising regional trade networks will help to maintain peace and stability in indian oceans. Explain (200W)

⇒ regional trade networks mean Area to transport goods and services in indian oceans. recently improve indian Export and Import as compare previous year.

main advantages of regional trade networks are below

- Improve transport to Good and services in ocean level global level.
- effectively participation industry and other stock holder to trade.
- the peoples migration, VISA problems, terrorism. Border violence slowly decreased.
- there are Economic prosperity and development achieved.
- other countries are transport is own food materials and main that countries produces.
- Improve interconnectivity problems.

there fore indian oceans is main network to transport and also connected Gulf of Oman, red sea and Mediterranean sea network

The Indian ocean is maintaining peace and prosperity as compared to mediterranean sea networks.

regional transport will decrease trade barriers and model other countries. Some problems are arises interstate transport problems, Governance barrier problems etc.

Indian ocean are mainly benefited countries were India, Sri Lanka, Pakistan, and that ocean ~~states~~ surrounding countries. recently marine fish problems are arise to kill fishermen and low level laws are mainly ~~are~~ concern this problem. Economic productivity other benefited. Some ~~the~~ countries Bilateral Agreements and trade and tariff barriers signed.

Therefore regional connectivity is benefited and some countries to other are not.

However Indian ocean is valuable product - rich to given by regional countries. there is ~~are~~ prosperity to hidden guts ocean and low level to natural problems.
