

Q

The Statement at the global level offers India the opportunity to focus earnestly on developing its climate change action at state and sub-state levels. Explain?

Recent Australian bush fire once again reminding world about climate change and its effects. India, the founder of International Solar Alliance, and Best Performer of Climate Change Performance index have many roles to play to control the climate change impacts.

India more vulnerable to climate change issues due to its location and socio-economic factors. The grass root level action plans like State action plan on climate change, prepare state level action plans to overcome climate change issues.

Some

## State Action Plan on Climate Change (SAPCC)

### Measures

1) Tamil Nadu, Conduct Several Researches, to tackle climate change issues in Coastal and Eastern ghats Region

2) Integrated Mangrove Fish Farming

An Indo-German Bilateral Cooperation, to conserve the mangroves in Coastal areas, to protect coast from storm surges and cyclones

3) Solar Parks and electric Vehicle Promotion Scheme by various State government for tackle air pollution issues

### Way forward

1) Better Coordination Among State Action Plans

Climate change is a global issue, then the integration of action plans between states and districts is essential one for better results.

## Fund Transfer

Most of the SAPCC works under the financial assistance of National Adaptation Fund on climate change and contribution of NAO's.

Make States accessible to global climate funds to develop the institutions and technologies to fight against climate change issues

### 3) Recognition of better results of States Apce

Like, Methanol Production and Utilization technology of Andhra Pradesh, Zero budget natural Farming of Karnataka need global recognition.

Integration and transparent climate change plans of State governments, leads the nation to better ranks in climate change indices, the State governments needs a separate climate change departments like Cricket Climate Change department for obtain better results.
