

## Infrastructure

In spite of spending on infrastructure, policies need to minimize the income loss from the impact recent pandemic. Discuss. (200 WORDS).

Pandemic - International travel.

- This question demands a preventing nature from pandemic.
- Initially all pandemic occurs for a month of over 4 and half months.
- But, this pandemic results in a tragic way of money spending in infrastructure rather than pandemic. (40 words)

- Formats should be taken into account to minimize the income loss in pandemic.

- Output of Govt. income = income from policies + GST + etc.,

- PREVENTION IS NOT ONLY BETTER THAN CURE, it is better than pandemic.

- Thus, a basic diamond crystalline model framework has to be formed by the govt. which can be drawn in the below format as follows,

Pandemic  
SUB

Area of  
Pandemic travel  
must be  
noted.

- i) Initiatives
- ii) Regular checkup
- iii) Sanitizing the  
area.

- These three steps needs to be maintained in a crystalline model i.e.  $\star$ .
- It is explained that if STEP 1 starts, step 2 and 3 should follow.
- If STEP 2 starts, STEP 3 and 1 should follow and vice versa.
- Thus, one can concentrate on reducing income loss by following this module.
