

- ① Many cutting edge-AI deployments are not designed specially for the children but are accused by them. what are the challenges with this situation. suggest measures to overcome the challenges (150W)

Technology is the era of 4th Industrial Revolution and artificial intelligence is the strength of this Revolution.

Artificial intelligence $\Rightarrow$ impact on children

- ① No justice for the Real Talent; many children are using AI tools to complete the Task.
- ② Major impact on female children/Girls: This platform have many features of misleading pictures and videos.

③ Decrease in mental ability & creativity

children try to unknowingly skip their work and it will impact them in long run.

④ physical Health Damage: not only AI, many adictions to children ~~and~~ ^{are} making undermine to physical activities.

⑤ Ethical knowledge will be lost by learning unethical activities from pre machined age.

Challenges of AI on children	How to overcome the issues
① <u>Real talent degrading</u>	① Measures should be taken from <u>ground of teachers</u> , To help children learning better thing from AI
② physical health.	② Parental Behaviour for Better Child future
③ ethical knowledge	③ Age Restriction on some content

'AI' is Better platform for children to learn many things to live in this generation. But with Better control on child activities, it can lead to Multiply their Success Rate.
