The road sector has imp. lessons for other infra. sectors and for Indian infra. in general to mobilize financial sources. Explain

The infrastructure creation has been expanding in the country with the proposals of National marketization Pipelines and Garhi Shakti project. The road sector has pivotal role to play with.

Lessons for Indian Infrastructure

The road sector doesn't have any independent regulators? so it is easy

to get onboard more PPPs and infrastructure build up. unlike other sectors such as telecom. etc.

As per World Bank India has the high PPP projects in Asia.

Also the marketization of brownfield

assets are taking place.

Four toll-operate and transfer models raised 17,000 crore and assets of 1400+ kms. The use of financial instruments such as Invits, NHA issued Invits of 8000 crore.

Also the cabinet has approved the model concession agreement CMCA to fast-track the approvals of statutory and regulatory provisions.

for other sectors

The firms are interested in beautiful assets, so a conviction regulatory framework with greater private participation can greatly unlock the opportunities for other sectors. It can help

attain SDG-11 - sustainable cities and communities
