Quality training for civil servants at all levels is a must for inclusive development of the country. Discuss

The minister Karmayogi has received a financial impetus of \$47 million from the World Bank. It envisions the ~~the~~ role of civil services to work specific rather rule specific

Training must for inclusive development as, the world order is dynamic a sync is inevitable. The capacity building must envision the future needs and work towards realising it.

For example, training regarding economic crimes, deep fake base AI crimes can help police force to counter effectively.

The training must be made as evidence based decision making. The training must remove the conflict between generalist vs specialist debates.

The morale building with frontline workers can improve and enhance the service delivery. Training regarding climate change and awareness about IPCC reports can ignite the thinking of ~~workers~~ climate governance with workers and staffs in Himalayan states.

The Karmayogi mission can lead to inclusive development of all, but it has to be sufficiently funded and the beneficiaries have to be trained appropriately.
