

Steeberg A-76 which calved
from Roane Ice shelf has showcased
the world the need of the hour
to tackle climate change

Climate change a natural phenomena
was hastened due to anthropogenic
activity has caused immense
damage to the Environment and
human society.

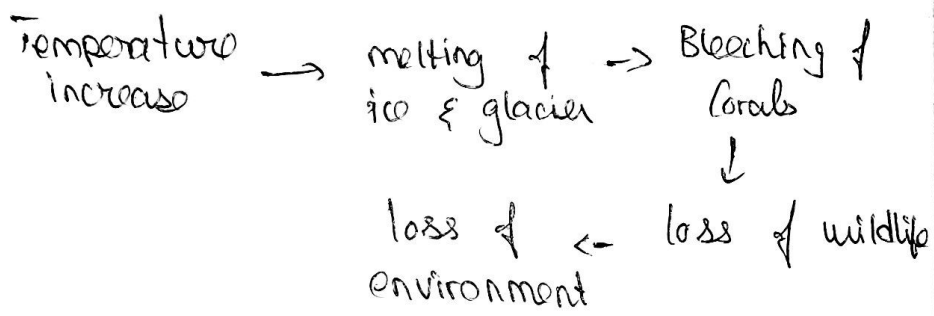

Recently two pre monsoon cyclones,
tauetae & Yaas, has alarmed
India to tackle climate change and
marked as an inevitable effect.

Conference of parties 26 (COP 26)
a platform / apex decision making
body of the united nation climate
change framework convention (UNFCCC)
to bring desirable solution to

achieve Sustainable development goal - 13 [climate change]

The current level of preparedness and measurement of reducing emission will not achieve the SDG - 13 of maintaining the global temperature at 2°C preferably 1.5°C as it will be at around 2.5°C.

This would lead to a irreversible damage to the whole world

COP 26 which is an upcoming event must effectively address the threat posed by climate change by sharing of naval technology, funds, Individual commitment, etc.
