National Digital Educational Architecture is a grand vision to utilize the power of technology to enhance India's educational system. Explain

The digital education space has seen a upsurge due to the pandemic. The National Digital Education Architecture (NDEAR) is a vital tool to transmit the online education.

NDEAR a welcome move. It invests on the open digital ecosystem approach where in interoperability is simple. It connects the already existing digital learning tools.

The Diksha, MOOCs, swayam, swayam prabha are all connected in NDEAR. It can give curated content, podcasts, etc which can be accessed seamlessly by the student. It breaks the geographical boundaries and

empowers educators. In Therabond
the Digi soft platform integrating
sms, whatsapp and TV to provide
education.

Areas to improve

The digital infrastructure in
schools needs to be improved. The
schools had only 34% of computer
connections.

The personal data protection
bill can strengthen the sharing, collection
of information of the children.
As they are exposed online for longer
time.

The existing national fibre optic
mission, National mission on digital
literacy can accelerate the efforts
of NDEAR to help attain SDG-4
Quality education
