

There is a need for public-pvt health model in order to provide affordable as well as efficient healthcare in country. Discuss.

The public private health models has greater potential to improve the health outcomes of the people.

Franchising - mobile health units
PPP in health care - Contracting

Telemedicine

The economic survey quotes cancer spending in private hospitals is the prime out of pocket expenditure. A robust PPP model can curtail the expense.

Successful models

- ① Yashaswini health scheme, Karnataka
It is a health insurance scheme where the government pays 50% of the cost of treatment.

② Telemedicine scheme, Karnataka

collaborating with ISRO it functions as coronary care unit for selected hospitals

③ Uttaranchal mobile hospital

Health checkup and diagnosis for several poor in hilly terrain at door step.

④ Emergency ambulance, Tamil Nadu

To decrease the maternal mortality rate in tribal areas. The government provides vehicle support.

Challenges in PPP model

Lack of quality control

↑
delayed payments

no grievance redressal

Lack of institutional structure.

Way forward

with clear terms and conditions with the contracting parties, the PPP models can reach larger populations and aid to achieve SDG-3 - Good health and well being
