Ques) How does the European Union can give a fillip to India's mission for a multipolar world order? Discuss-

Ans) With the US' hegemony subsiding and China's conflicting claims, India looks forward for a multipolar world order. European Union seems to be a alternative for focussing foreign policy ~~on~~ towards it.

The recent EU Indo Pacific strategy Partnership with ~~the~~ Denmark's president is a step forward in this way.

EU and India have decided to strengthen strategic cooperation in defence, communication, technology, power sharing etc domains.

The 27 EU nations provide wide avenues for strategic cooperation for India for National interests as well as for maintaining global world order in its favour.

India has opted for openness and inclusivity in its foreign policy with EU and has also shedded the colonial negative affect.

EU also seems to be interested in
furthering the diplomatic ties with
India as is reflected ^{from} its focus
on "Indo-Pacific strategy".

EU India has already maintained
cooperative friendly ties with France,
in military cooperation, and Britain
with bilateral trade carries. ~~It~~ ^{It} ~~gives~~
~~fact~~ other nations must also be looked up
for strategic cooperation.

Pa
Diplomatic relations with European nations
will avert the dominance of the two major
superpowers and also provide India
for developmental cooperation.
