

4 From Myanmar to Israel Asian countries are grappling with attacks by militants. How it will impact India. What steps should India take.

The Asian countries are going through rough waters of late due to attacks perpetrated on them due to non-state actors which will have impact on India.

Impact on India

① Houthis — The Houthis attacks on vessels around the Gulf of Aden and Red sea is a cause of concern. As India imports 85% of oil, attacks on our vessels can shoot up the fuel prices.

② Israel war — The Israel war does not seem to end anytime soon, international pressures are not working. This can drag the market and investments backword.

③ Myanmar - The usobs groups head towards fourth year, India has unfenced borders with them, this can increase unlawful and drug use business in India.

④ Pakistan - Iran - Tense has been established after brief clashes, blaming our hand in the attacks.

Indian measures needed

① Security - The Operation Sanctuary can be swamped with other countries support and deployment of naval ships and increase work of INS Vishakhapatnam, is worth mentioning.

② Dialogue - Our foreign minister visited Iran and made sure our safe passage of ships. This can be done at all levels of conflicts.

③ Outreach: Garnering international support for global peace using United Nations.

The surrounding conflicts must be seen as opportunities to establish and affirm our image as Vishva Gaurav with targeted approach.
