

The military confrontation b/w Israel & Hamas has
↑ to regional security crisis. Discuss challenges for India.

The ongoing Israel Hamas conflict
has is growing beyond Israel and Palestine
bringing non-state actors and other nations
into the maze of conflicts.

Regional crisis The war that was started
on land in Israel has moved towards the
Red sea and Indian Ocean

The pro Gaza and Hamas supporters
have taken to the sea attacking the
commercial vessels plying across Red sea
disrupting trade, Gulf oil supply and
merchant safety in the region.

India has many challenges
associated with the war. The involvement

of terror groups such as Iskone etc etc
can drag the war further.

Challenges for India

① Trade India recently inaugurated the India middle east European economic corridor that aims to connect India with Europe through middle east.

The ongoing tensions can put the dialogue in limbo that can counteractively impact on our trade.

② Co-operation The I2U2 initiative can remain a non-starter as Israel is the main player involved in the conflict. The doors of investment and technology from UAE and US, Israel will be delayed for India.

③ Rupee depreciation - The Rebel groups targeting the oil tankers on the

Gulf of Aden and Red sea can increase the oil prices which can bring down the value of rupee which is now trading at ₹83/dollar.

④ Global image India always vouched for a dehyped policy with Israel and Palestine. Non involvement of India in the conflict can tarnish the image of "Vishva guru".

⑤ migrants more than three million workers inhabit in the region, their safety and security is under question due to the conflicts.

The International Criminal court has started investigation against Israel. The ~~abstract~~ between the warring groups must follow international conventions as the region is crucial for India's developmental aspirations to the Amrit kaal.
