

Farm Mechanisation holds the key for sustainable and efficient development of Indian Agriculture and rural economy.
Analyse (200 words)

Farm mechanisation is way of upgrading agricultural activities by using modern equipments that increases efficiency and yield of farmers.

Prevalent issues in Agriculture

- (1) Small land holding of farmers. So mechanisation will not be efficient.
- (2) Small and marginal farmers can afford ^{only} equipment like tractor, harvester among other.
- (3) Agricultural credit is very low or not commensurate to modern demand of farm mechanisation.
- (4) Hesitant nature of farmers to borrow loan to institutional credit machinery because of
(4.1) Bad attitude of banks towards them.
