

21.
National Infrastructure Bank (NIB), is a type of financial institution to fund Infrastructural projects by issuing long term bonds and depending of Pro Employment Provident Fund.

NIB can act as a key for achieving a sustainability in development.

long-term fund : Unlike a commercial bank it won't disrupt the undergoing project due to funding issue.

NPA : NIB will not accept public deposit and focus only on infrastructural projects therefore it do not deal with dead loans.

High investment : NIB will bring investment and expertise from international level thereby increasing investment.

Continue flow of fund : Funds will be provided even during difficult situation in the economy.

Way forward :-

- Proper policy framework from government is necessary.
- flexible funding must be allowed depending on the type of project.
- It must attract private investment therefore suitable platform must be created.
- Encourage innovative financial ideas for efficient functioning.

Several estimates suggest that an investment of 1% of GDP will generate 2% of GDP. Therefore along with National Infrastructure Pipeline, Digital Financial Institution and several other India scheme, NIB will assist in the development of economy.
