① for safe foods there is a need to develop lab infrastructure in states?

FSSAI has published Food Safety Index 2022 recently according to significant parameters Index has been published.

Among larger states - TN tops the list followed by Maharashtra Gujarat

Among smaller states - COA tops followed by Manipur & Sikkim

In UT's - Jammu & Kashmir occupies 1st place followed by Delhi & Chandigarh

④ parameters taken to calculate Index were:-

- * Compliance - 30% weightage
- * Consumer empowerment
- * Food testing - infrastructure & surveillance

* Training & Capacity Building.

Steps need to develop food quality :-

* Centre should support the state/UT ~~till the~~ in setting up of laboratories & improvement of manpower.

* Private players should step in and finance state/UT in improving the productivity of food.

* ^{participation of} Information Technology (IT) & NGO should help in utilizing the surplus food by distributing to needy.

Govt initiatives in improving the food quality :-

① eat right IND movement

↳ transforming the food ~~into~~ sustainable ecosystem in order to ensure sustainable & food for all Indians.

② eat right station Certificates

↳ FSSAI ^{awards} ~~provides~~ certificate to railway station which provides healthy & safe food for all.
