

Q.

State schemes provide vast scope for the improvement of Pradhan Mantri Vanana Yojana to achieve the desired target explain.

Ans.

Pradhan Mantri ^{matru} Vanana Yojna was rolled out on 2017 has covered 2.01 crore women nationally, distributed 8,722 crore.

Why this scheme needed?

India account for fifth of total child birth in world. 260 lakh women deliver on an average a child each year in India.

→ Schemes - benefits/issues

5000 as directly → 128.7 lakh registered for maternity leave

→ issues

→ 40% total registered → more than 9% get benefit 50% → drop in 20% reduction in 2021-22 budget → of not received benefits

→ pending paper work integrated from 8722 with SAMARTHA, 70 Mahila Sakti crore. etc.

Solution :-

(1) State Scheme: like KCR kit for
- m telangana, MIRMBS - tamilnadu, Odisha's manta scheme work (Perfo
- mung quite good on state level.
ex. Manta showcased 57% increase
in registration while PMMVY 52%
drop.

(2) Reform :- Since PMMVY offer
5,000 for year as a wage loss but
it's not enough. we need to increase
compensation. ~~second~~ ^{child} no scheme avail

(3) Simplify Process :- long paper
- work, different document issues
need to simplify it. because the most
- e document means pending in work

(4) no awareness :- People from trib
- le area do they are aware and
do they have adequate instructions
re and valid document ? if not
than application will be either rejecte
- d or pending.

Conclusion :- even though it does
help women for some extent but
if we reduced this obstacle than
surely we'll see some great
results.
