

The concept of open schooling in rural areas can address the various concerns present in the Indian Education System. Explain.

Concept of open school means flexible time and location of studying, and learning and understanding the concept.

Help in Rural areas in various sectors:

(1) Help in proper regular attendance
→ due to lack of infrastructure the students can study from their home on any location.

(2) The nos. of dropouts will reduce.
→ Rural areas students drop from the school or college secondary school due to lack of money and other support.
→ The dropout rate is approx 17.06%.

(3) Proper utilisation manpower.
→ skilled education or steps to get the manpower or human resource get skilled from various portals will help to use manpower efficiently and the portals are like SWamyam, Diksha Vocational channels and etc.

→ Acc to a report approx. 4.3 lakh engineers and approx 7 lakh students are unskilled and not used as resource.

(4) Financial stability %

→ People ~~too~~ centuring the online class can work on their free time which help to gain financial stability for the other family members

~~The concepts resolved can be~~

(5) The Infrastructure :

In Acc. to CAG report the school infrastructure are not properly developed with all the basic facilities which are req. by the person to maintain hygiene.

* Need :

→ only a device with internet connection

Conclusion :

The open school concept can help people to do multitasking, improve stability, skills and also the no. of dropout will also reduce.
