

Explain PB & HR contributions in National Food security even with average shift to other crops.

The Paradiphar Minister Georib Shalyan  
Anna Yajana has been made free for  
the next five years. This is possible  
with the needed support given by  
Parjib and Aaryana

Contributions to food security

The two states are the major  
beneficiaries of the green revolution  
have been the major supplier to  
the central food grain pool.

Though the share of states  
has reduced from 90% to 65%  
in the last three decades yet  
through contribute significantly.

Enduring shocks such as

less rainfall and El Niño impacts  
Punjab and Haryana ~~feared~~ <sup>feared</sup> well with  
winter wheat production than  
other states.

The Net sown area in the

states are more than 90%.

and the per hectare yield of wheat

and rice is well above national

<u>crop</u>	<u>Yield</u>	
	PB&HR	India
wheat	4.8/ton	3.5/ton
rice	6.5/ton	4.1/ton

combined these factors the  
states remain as the main shock  
absorber in terms of div need  
and supply the food for the needy.

through the ~~issues~~ sowed the country at many times issues persist

## Issues

\* Regal demand of minimum support prices based on MS Swaminathan formulae.

\* Depleting groundwater resource due to mono-cropping

\* Increase in plant diseases such as wheat blast and rust attack.

\* Improper storage infrastructure.

Punjab and Haryana have seen average shift to other crops such as cotton and sugarcane. Their legacy of food security champions still holds value.
