

Discuss the policy instrument that are req. to ensure a price stability and steady availability of pulses in the country.

Pulses are the nutritious substances which is req. More by the body.

Acc to Mit Agog report there is estimate that by 2030 there will be shortage of pulses and it is projected that the shortage to be of 50 million tonnes.

Price Stability

The deficiency leads to the price fluctuation with high inflation rate.

measures of ~~flow~~ price stability

(1) To establish small processing unit
↳ Small processing unit can help to maintain the supply of pulses

(2) To improve storage facility:-

↳ Due to storage facility will help farmers or cultivators to store for long period and can maintain the supply

(3) Collaboration with SHGs & other group

↳ the fund for cultivation and storage can be gained by self help

Groups and other bank at low rate

↳ help to improve infrastructure and supply

Conclusion

→ There is a need to maintain the proper infrastructure for pulses to avoid over pricing and price stability to maintain the diet, health of all people of society
