1. what are the various ways to make the digital space safer for all, particularly women? Elaborate.

India is country with young youth demography with 24.1. in Generation X' & 34.1. in Millenial. With digitisation, Interaction & Inter connection increased. But it also causes harm, particularly vulnerable is women.

Crimes against women

Crimes India statistics of National crime Records Bureau - around 10000 cyber crimes reported against women in 2020., 24.1 jump from 2019.

Various forms of abuse include - cyber blackmailing, pornography, defaming, fake accounts & others..
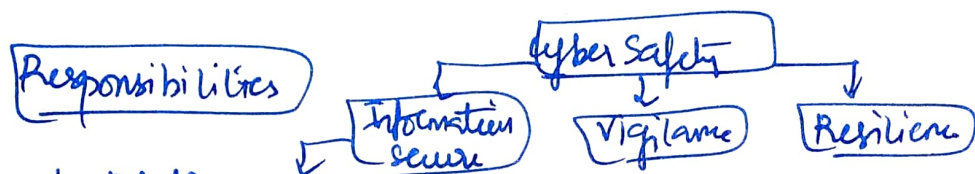

Reasons for increasing abuse = women.

1. private pictures - leaked online through hacked accounts (or) Source relationship
2. New social norms— sharing intimate pictures to express sexuality among youth is leading to Increased New forms of abuse

Efforts - to tackle these abuses

1. New Information technology act; helps to provide safety & security particularly to women & children.

2. The Act provides for discussion on the threat of evolving nature of abuse. There by making _Evidence based Intervention_.

3. Leading _Academics_ are also increasing involved in studying evolving new _forms_ of online _abuse_.

Responsibilities

Cyber Safety
→ Information Secure
→ Vigilance
→ Resilience

1. Platform providers must also take responsibility. Interventions - like 'Design choices' to make women contact via ⌀ ⌀ $ and leaveraging 'open source platform' to identify and blur lewd images. (_Information is secured_)

2. vigilance → Safety tools & techniques in websites and applications.

3. Resilience → societal support and _public discourse_ of evolving threats to spread awareness

All _Stakeholders_ must Btake responsibility to act in coordinated way, so digital space safety for women as _safety of all_ $ in particular women.

" Embrace technology & being. cyber smart. "
