

Q. MGNREGA'S Performance is possibly the most important proxy for the ~~most imp~~ health of the informal economy, however a number of issues affects its performance (200 words)

Ans. Mahatma Gandhi National Employment Guarantee Act 2005 provide 100 days employment and wages to labour in rural area.

around 50% of our economy depended on informal sector or field. more rural and urban rural people depended on MGNREGA'S during pandemic.

(1) fund :-

even the MGNREGA'S show quite good results in rural area for work but due to short of fund in local or state level even their's work they don't hire more workers.

(2) wage :-

mostly they provide wages after work done maximum 15 days. but currently they provide SCST community in 15 days meanwhile other 2 month

State like Tamil Nadu, Bangalore, Madhya Pradesh, MP, etc.

(3) Central-State :-

there is different issues between central and state. for ex. fund, providing employment and wages, decision on mining matters etc. need to solve this issues.

(4) inadequate data :-

Since MGNREGS workers mostly belong to informal sector we don't have adequate data to provide further improvement or assist them. so we can trace them if they migrate other state to provide work.

even though after pandemic we ~~expend~~ ^{expend} our budget from last year's ₹73,000 around 2.1% of total budget which is insufficient. we can also use help of digital platform like Skillset.

which collect data of labours, center also need to work with state issues if not the scheme will not show the result which we want.

In short if we tackle issue survey we see better results in economy as well labour worker's life.
