

Better progress on social indicators happened due to prompt policy making and effective implementation. Substantiate

India became the fifth largest economy with value of \$3trillion. This has to be translated to the general public through shared prosperity which has happened.

Better social Indicators

Health - The centre and the states health spending increased to 2.1% of GDP in 2023 compared to 1.6% in 2021. The out-of-pocket expenditure came down from 64% in 2015-16 to 48% in 2019-20. Thanks to the Ayushman Bharath scheme which has over 22 crore beneficiaries.

There is substantial reduction in infant mortality rate, maternal mortality rate as indicated

by the National Family Health Survey-5

social the social sector spending

increased from ₹ 9 lakh crore in

2016 to ₹ 21 lakh crore in 2023.

The UNDP's multi dimensional poverty

reported says that 41.5 crore

people were out of poverty from

2005-06 to 2019-20.

Education the gross enrolment ratio

increased for both boys and girls

and 23 IITs, 20 IIMs and 600 medical

colleges are present.

The government measures and
schemes are in the right direction

towards achieving the goal of

Sustainable Development Goal - 3 reduced inequalities.
