

The pandemic has highlighted that to handle any social problem there is a need for a collective action that coordinates the aspirations of several group of stakeholders explain

History taught us community actions enabled society to overcome the failures, disasters, over the year, handling COVID-19 pandemic requires collective action of different group of societies

1] Non governmental organizations

They can amplify government effort in providing health infrastructure like oxygen concentrators, vaccines & also create awareness

2] Local self government

Each gramapanchayat may take pledge to make covid free villages,

3] Medical practitioners

They work selflessly, create awareness through social media platform, work as COVID workers preferably rural areas.

Ex:- 1992 batch students from Bengaluru medical college created Telemedicine platform

• Group of young doctors work in their village in Udipi district as women workers

4] Corporate Houses

Through corporate social responsibility they can upgrade primary health care centres, and giving ^{the} insurance to their employees

Ex:- TATA steel announced social security to family of employe died of COVID 19

5] Universities & research institute

Contribute by invented COVID-19 testing kits,
or medicine to quick cure, low cost PPE kits,
or data technology to connect different
stake holders

Ex:- Breathe India & Help Now apps of
IIT, DRDO D2G medic

6] Religious institute - Food to poor, temporary
quarantine, etc

NETI Aayog can utilize DARPAN
portal which consist of NER's engaged
development activities, Govt. also support
startups & MSME's to innovate things to
contain pandemic
