

Yes, Social Safety net is needed to manage the after effects of tropical cyclonic storms in India.

Why they are so dangerous?

- \* ~~It~~ The past experiences of cyclone ~~years~~, Taukate affecting the areas of West Bengal, Odisha, Bihar
- \* The cyclone Amphan which caused a huge devastation of public lives & property & infrastructural damage.
- \* The cyclones created in the Arabian sea of ~~Bahrain~~ <sup>Gulf of Bengal</sup> to nearly ~~2-3~~ <sup>1.7</sup> heat the which is a minority but they cause huge losses to the coast lines

~~REAS~~ EFFECT OF THE CYCLONES

- \* The coastal areas are heavily / dense populated
- \* Causes loss of lives, properties, livestock etc

27

MONDAY • JUNE

- \* Dangerous to the coastline fishermen
- \* Flood prone These areas are low lying capturing huge quantities of rain fall.

CAUSES:-

These Environmental changes. Natural calamities can be treated along with relief + mitigation measures. GHG gases has caused rise in temperature of  $1.5^{\circ}\text{C}$  which causes these detrimental cyclone.

CONCLUSION:-

- \* The ~~WDRF~~ Social Safety nets are much needed.
- \* People and government should coordinate to help in mitigation + relief measure
- \* Moral support to the victims

- \* Timely ~~pro~~ supply NDRF ~~formation~~
- \* ~~Pro~~ Awareness should be created
- \* Robust & efficient alert systems & communication are needed
- \* Flood prone coastal areas should be evacuated & proper housing should be provided to people in other area.
- \* Mental health care, counselling, ~~pro~~ rehabilitation centres to which the victims who lost their families can be sent by government along with voluntary cooperation of NGO's.
