

e - Rupee

The e-Rupi is an important step towards transparency in welfare aspect, but the govt of India must do more for better public service delivery. Discuss:-

On the way to digital India, ^{the} e-Rupi Scheme like e-Rupi putting us ^{step} a forward in digitalising India.

Yes we can agree that e-rupi is a important step towards transparency. By saying the below this.

- * e-Rupi will directly transfer to the beneficiary through mobile which does not require a Smartphone.

- * He will receive as a QR-code or SMS string. By using it he can directly collect the use the service with out ~~be~~ believing 3rd person.

- * Digital voucher ^R redeemed by beneficiaries to avail themselves of a ~~specia~~ specific services.

- * It is a contact less prepaid payment system.

+ This 12-Rupi scheme put the out of money from the corrupted officer who not blocking beneficiary ^{money, not} more to use them..

+ ~~It also reduces the to do be~~

+ It also helps the beneficiary to reduce the dependancy on the Govt officials. on Seeking there hands.

Better Services need to improve by Govt:-

+ Due to low literacy ^a and will take this scheme to avoid it govt should make aware of the scheme to people in more wide angle.

* People do not have proper signal to recieve SMS (or) Digital QR code.

Eg: people Tribble people in train terrain, also to people in North Eastern part of India will as affected.

* Due to the Huge gender gap in having mobile. More than 71% of men having mobile & some house-hold do & not have personal mobiles.

+ Some innocent people can be threatend by & they can be forced to use ^{it} for there own purpose. without the permission of the beneficiary

Above all, the way which layed laid by the Govt is most welcome. This scheme will ensure the govt se subsidy will directly put it into the hands of people not in the mouth of crocodile.
