

Hon'ble PM in his Bangluru Tech Address stated that digitisation is becoming a way of life in India, however, government need to ensure digital security for a true digital India.

With JAM Trinity - Jan Dhan - mobile and Ahaar, there are around 800mn mobile phone connectivity in India. Digital India has changed the way of life through - Direct Benefit Transfers of schemes like MDRGA.

PM PFMS has brought digital monitoring & dispute readdressal. ENAM has digitise Agri-market while applications like Meghdoot provide real time weather forecast to farmers.

covid 19, and demonetisation has boosted - Tele-medicine, Teleeducation

and fintech sectors.

but, despite this, India ranked poor at 48/65 place in digital readiness index of IMD, which highlights India's performance in adoption of new technology.

similarly NCRB data shows 67% rise in cybercrime in 2020 from 2019, which highlight failure of security agencies to secure digital space.

similarly, digital literacy & digital divide - among regions and between gender has excluded beneficiary and is enforcing gender prejudices.

Thus, government need to build a trustful environment for the adoption of sustenance of technology.
