

Environment

③ International court of justice has an important role in addressing the issues related to climate change and reparations. Analyse
(200 words)

International court of justice has two major parts, one is advisory another one is bindable to the party members.

Here, we see the advisory part of International court of justice

Addressing the issue

① It takes precautionary action advice to stop ~~sea level~~ temperature rising.

② World meteorological department (WMD) report (world temp above 2°C)

2. ~~Addressing~~ the Reparations part for loss and damage for developing countries

eg. COP 27 accepted loss and damage cost, and assist financial support to affected ^{countries}

3. concern for small island nation with regards sealevel rising

4.

Limitation

1) ~~is~~ only an advisory, not bindable led to paralysed body

2) No enforcement of law, makes the country violate the law.

3)

Way ahead

• ITLOS - International Tribunal for law on sea. restricted party members to stick with temperature level

• UNCLOS - United national convention law on sea helps them to enforce law
