

Gov policies

2) Absolute vesting power in the geological survey of India alone may impede paleontological research.
Do you agree with this view? comment

Recently, geo-heritage and geo-relics amendment bill specifies some powers in the hand of geological survey of India.

Impede paleontological research

① Non-independent - Director general declare site of heritage.

② Taking from private people - without consideration with many stakeholders
↳ deteriorates the trust of people.

③ Director general have a power to fine fine × Imprisonment
↳ So, It have conflict on judiciary

④ two heritage bill 2022,
State fine for violator

④ Bio survey of India has prohibit
infrastructure development

⑤ GI prohibit 100 meters
area from its geo-heritage area

Way ahead -

① National geo-heritage - democratic
committee for declaring sites.

② Discussion committee consists
of stakeholders stops unwanted prohibition.

③ Setup Geo-heritage tribunal
may reduce conflict between judiciary
and bio survey of India

④ Guidelines for people - to construct
infrastructure away from the sites.

It is the right time to study the
draft and make discussions upcoming
Parliament session to tackle this
issue in India.
