

Geographical position :-

W. Character

Nepal

UP

Bihar

Nepal is a land locked country. The

southern part of Nepal is Terai region
flowing into India of many rivers.

Flood Prone Area :- It is home of many
rivers originating from Himalayas.

* The river flowing to India enters
Bihar region.

* Due to ~~the~~ monsoon, river flow increases
affecting north of Bihar.

FLOOD DEVELOPMENT IDEAS:-

* Flood management is must to control
prevent the damage caused so which
has lead to much more loss of
human life.

M	T	W	T	F	S	S
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

* Building dam on river Kosi, Kamala, Bagmati river can help tremendously prevent loss of lives, cattle etc. in flood prone area.

Problems:-

- * Cwe, MoJ, GOT together held a special meeting of joint team to ascertain the status of project.
- * There is always pending status of approval by the Nepal.
- * Nevertheless, project has been approved in Kosi river leading to completion of 21 out of 22 project.
- * ^{Despite} Cwe, Water Resource Management has to expedite approving project in Gandhak & Baratala project.
- Pandemic 19, local resistance has been lately affecting the project development.

CONCLUSION:-

* ^{Despite local resistance, flood management project} ^{of Nepal} in establishing bilateral cordial relationship with India is important.

* ~~Issue~~ Issue on Zabekei river secondary maintenance needs to be sorted out due to lack of permission.

* Maintaining an efficient relationship can resolve the Nepal's attitude like water sharing, floods etc.

* Thus, flood management is an alternative paradigm exhibiting a best spirit of friendship to sustain water dialogue & safeguard the interests of attacked along border.
