Ques) A sustainable refugee policy is a necessary step to intelligently manage population movements and ensure transparency in India's administrative actions. Discuss.

Ans) India has always shown its endeavour towards providing refugees and migrants homage in its land. on humanitarian grounds.

According to UN in 2020, 86.4 m ~~more~~ people had to leave their homes and 20 million among them were refugees.

Refugees in India have been a significant contributor in manufacturing, innovation, service sector etc. They add in their extra experience and draw distinct cultural factor in projects while in India to which contributed towards economic development.

India is also a non signatory to The Vienna Convention of 1961 for the cause of security and national interest.

Thus, it becomes an imperative to have a well defined on all encompassing Refugee policy to enable a prop transparent and undisputed management of refugees.

Refugee Law

- varied provisions for specificity
- clarity of laws and granted rights
- dispute resolution effectively
- enable recording of data
- in line with international laws.

therefore,

A refugee policy would help in effective administration and preventing managing population movements in the favour of Indian government as well as ensure natural human rights to the refugees in line with the rule of law.
