

Q. Having proper social infrastructure ensures better impact on the learning outcomes for children in the country. Discuss?

Ans:- In modern time we need to connect every educational platform with proper manner that can help improve children's more and glorification of education or learning will not be black in any how situation.

Following are the important work need to improve the way of learning in safe zone:

(i) In many of the concerns the main problem is to safe drinking water and clean cooking fuel leads to divides health concerns. It concerns many of the childrens are not able to have their education or it creates problems in their ways.

(ii) The importance of safe water in preventing water-borne diseases, and its role in hand-washing and maintaining sanitation and hygiene hardly need to be reiterated.

(iii) Solid fuel burning has also been linked to the prevalence of acute respiratory infections (ARI), causing affecting more women and children.

(iv) U.S. Environmental Protection Agency (EPA). exposure to wood & smoke can also have leave individuals more susceptible to cooking.

Insightson.

- (v) LPL connections has improved vastly in India in recent years with the launch of the Pradhan Mantri Ujjwala Yojna (PMUY).
- (vi) At the All-India level 94.3 percent of households had an LPL connection in 2019.
- (vii) By NSSO house survey in 2019, 42.8% of households in rural areas continued to use firewood as their primary source of cooking fuel.
- (viii) The high cost of LPL refill being the primary deterrent.
- (ix) In 2020 under Pradhan Mantri Garib - Nyas Yojana (PM GNY) extended three-free LPL refills till September 2020; this may have temporarily increased LPL uptake.
- (x) In Budgetary allocation for 2020-21 LPL subsidy was increased to Rs 14,073 crore this year, from 87,256 crore in 2020-21.
- Now providing both physical and financial access to the cooking infrastructure - like LPL and piped water - that gives up mother's time to supervise children's learning outcome.
